63572 7590 09/19/2007 MCDONNELL BOEHNEN HULBERT @ BERGHOFF LLP 300 SOUTH WACKER DRIVE SUITE 3100 CHICAGO, IL 60606			EXAMINER MURRAY, JEFFREY H	
			ART UNIT 1624	PAPER NUMBER
			MAIL DATE 09/19/2007	DELIVERY MODE PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/522,004	Applicant(s) RICE ET AL.	
	Examiner Jeffrey H. Murray	Art Unit 1624	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 January 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 67-136 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☐ Claim(s) _____ is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☒ Claim(s) 67-136 are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- I. The compound or composition of formula (I), according to Claims 67-125 wherein Z is -NH-, R¹ is a CH₃, and M¹M²M³M⁴ represents a seven-membered or larger nitrogen containing heterocyclic ring.
- II. The compound or composition of formula (I), according to Claims 67-125 wherein Z is -NH-, R¹ is a CH₃, and M¹M²M³M⁴ represents a six-membered heterocyclic ring with at least 2 heteroatoms, at least one being nitrogen.
- III. The compound or composition of formula (I), according to Claims 67-125 wherein Z is -NH-, R¹ is a CH₃, and M¹M²M³M⁴ represents a six-membered heterocyclic ring with one nitrogen.
- IV. The compound or composition of formula (I), according to Claims 67-125 wherein Z is -NH-, R¹ is a CH₃, and M¹M²M³M⁴ represents a five- or four-membered heterocyclic ring with at least one nitrogen.

- V. The compound or composition of formula (I), according to Claims 67-125 wherein Z is -NH-, R¹ is a CH₃, and M¹M²M³M⁴ represents a sulfur or oxygen containing heterocyclic ring with no nitrogen ring members.
- VI. The compound or composition of formula (I), according to Claims 67-125 wherein Z is -NH-, R¹ is a CH₃, and M¹M²M³M⁴ represents a -CH₂- coupled to a seven-membered or larger nitrogen containing heterocyclic ring.
- VII. The compound or composition of formula (I), according to Claims 67-125 wherein Z is -NH-, R¹ is a CH₃, and M¹M²M³M⁴ represents a -CH₂- coupled to a six-membered heterocyclic ring with at least 2 heteroatoms, at least one being nitrogen.
- VIII. The compound or composition of formula (I), according to Claims 67-125 wherein Z is -NH-, R¹ is a CH₃, and M¹M²M³M⁴ represents a -CH₂- coupled to a six-membered heterocyclic ring with one nitrogen.
- IX. The compound or composition of formula (I), according to Claims 67-125 wherein Z is -NH-, R¹ is a CH₃, and M¹M²M³M⁴ represents a -CH₂- coupled to a five- or four-membered heterocyclic ring with at least one nitrogen.
- X. The compound or composition of formula (I), according to Claims 67-125 wherein Z is -NH-, R¹ is a CH₃, and M¹M²M³M⁴ represents a -CH₂- coupled to a sulfur or oxygen containing heterocyclic ring with no nitrogen ring members.

- XI. The compound or composition of formula (I), according to Claims 67-125 wherein Z is -NH-, R¹ is a CH₃, and M¹M²M³M⁴ represents a -CH₂CH₂- coupled to a seven-membered or larger nitrogen containing heterocyclic ring.
- XII. The compound or composition of formula (I), according to Claims 67-125 wherein Z is -NH-, R¹ is a CH₃, and M¹M²M³M⁴ represents a -CH₂CH₂- coupled to a six-membered heterocyclic ring with at least 2 heteroatoms, at least one being nitrogen.
- XIII. The compound or composition of formula (I), according to Claims 67-125 wherein Z is -NH-, R¹ is a CH₃, and M¹M²M³M⁴ represents a -CH₂CH₂- coupled to a six-membered heterocyclic ring with one nitrogen.
- XIV. The compound or composition of formula (I), according to Claims 67-125 wherein Z is -NH-, R¹ is a CH₃, and M¹M²M³M⁴ represents a -CH₂CH₂- coupled to a five- or four-membered heterocyclic ring with at least one nitrogen.
- XV. The compound or composition of formula (I), according to Claims 67-125 wherein Z is -NH-, R¹ is a CH₃, and M¹M²M³M⁴ represents a -CH₂CH₂- coupled to a sulfur or oxygen containing heterocyclic ring with no nitrogen ring members.
- XVI. The compound or composition of formula (I), according to Claims 67-125, which does not fall into Groups I-XV.

- XVII-
XXXIII. A method of modulating the in vivo activity of a kinase, as in any one of Groups I-XVI, according to Claim 126.
- XXXIV-
XLVIII A method of treating a disease or disorder, as in any one of Groups I-XVI, according to Claims 127-136.

2. The inventions listed as Groups I - XLVIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking the claims is a compound of formula (I). Prior art exists which causes the core structure in the current application to lack a special technical feature. When Z is -NH- the ring system is an N-phenyl-quinazoline-4-amine. This ring system is seen in numerous patents and papers, for example: Bridges, et. al., *Journal of Medicinal Chemistry*, **1996**, 39(1), 267-76; which teaches the synthesis of N-phenyl-quinazoline-4-amine derivatives which all contain an oxygen substitution in the 6 and 7 position of the quinazoline ring. Therefore the features linking the claims does not constitute a special technical feature as defined by PCT Rule 13.2 as it does not define a contribution over the art.

Accordingly, Groups I – XLVIII are not so linked by the same or a corresponding special technical feature as to form a single general inventive concept

3. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder.

All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

4. In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

5. This application contains claims directed to the following patentably distinct species: all of the various named compounds listed in Claims 105-112. The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Claim 1 is generic.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are

added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey H. Murray whose telephone number is (571) 272-9023. The examiner can normally be reached on M-F 7:30-5pm EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. James O. Wilson can be reached at 571-272-0661. The fax phone
